

COBIT[®] 5 Assessor Certification Training Course - Brochure

Take your IT Governance Career to the Next-level

What is COBIT?

COBIT stands for Control Objectives for Information and Related Technology and is a framework developed by ISACA for governance and management of enterprise IT. According to ISACA, COBIT is an IT Governance framework and supporting toolset that allows enterprises to bridge the gap between control requirements, technical issues and business risks. The framework enables robust policy development and best practices for IT control across the enterprise. COBIT clearly highlights regulatory compliance and enhances organisation's ability to increase the value attained from IT.

Key Benefits of COBIT for Businesses

- Increased value creation from use of IT
- Aligns enterprise services better to the business
- Reduce the inherent risk of downtime
- Increased user satisfaction with IT engagement and services
- Advocates development of business-focused IT functioning
- Separates governance from management
- Provides holistic approach towards business decision making

About COBIT 5 Assessor Training Course

Invensis Learning imparts PEOPLECERT accredited COBIT 5 Assessor training. This is a practitioner-level certification and training course that helps individuals and enterprises to apply Process Assessment Model (PAM) and gain comprehensive understanding of the COBIT framework. As a COBIT 5 Assessor certified professional you will be able to showcase your knowledge in assessing existing capabilities of critical processes in an enterprise. With this credential, you clearly indicate your employers that you are ready to move up the ladder in IT Security and Governance career.

Who will benefit from COBIT 5 Assessor Certification

Job roles that can benefit from COBIT 5 Assessor certification include, but are not limited to:

- Internal Auditors
- External Auditors
- Consultants
- IT Governance Managers
- IT Process Owners
- Information Security and IT Practitioners
- IT Service Managers, and more
