

PMI – Agile Certified Practitioner (PMI-ACP)[®] Exam Prep Training - Brochure

Take your Career to the Next-level with a Globally-recognised Credential

The Importance of PMI-ACP Certification

In today's fast-paced work environment, there is a greater need for experienced project managers across the globe. If you are working on a project and you are experienced in using agile approaches, and have good collaboration skills, accept complexity and thrive in a stressful environment, then your talents are in great demand. The PMI-Agile Certified Practitioner (PMI-ACP)[®] is a globally-recognised certification that helps you to demonstrate knowledge of agile principles and your understanding of agile techniques. The PMI-ACP certification helps you to stand out from the crowd and shine in front of your employers and peers.

With PMI-ACP credential, knowledge gained by project managers spans many approaches in agile such as Kanban, Scrum, extreme programming (XP), Lean and test-driven development (TDD). Hence, increasing your adaptability with regards to how you approach your projects.

The PMI-ACP Certification Advantage

Certifies your talent:

The PMI-ACP credential is proof that as a project manager you have the experience and skills to apply agile tools and techniques to make the project successful

Improves your earning prospects:

Professionals with PMI-ACP credential usually see better salary hikes than their non-certified counterparts

Opens doors:

A PMI-ACP certification gets you access to world renowned organisations of your choice

Widely applicable:

Since PMI-ACP certification is widely-recognised across the globe, its applicability is universal across industries, market segments and geographies

Continuous learning:

In order to maintain your PMI-ACP credential valid, you will have to keep yourself updated at regular intervals with best practices in the domain of agile project management

Eligibility Criteria

The following educational and professional criteria must be met to be eligible for the PMI-ACP certification:

Educational Background : Secondary Degree (high school diploma, associate's degree or global equivalent)

General Project Experience : 2,000 hours (12 months) in project teams, which must have been acquired in the last five years.

Agile Project Experience : A minimum of 1,500 hours (8 months) in project teams or teams that employed agile methodologies. This experience should have been earned in the last three years and these hours should be in addition to the 2,000 hours of general project experience.

Training in Agile Practices : 21 contact hours in agile practices.

Did You Know?

- *According to PMI's "2015 Pulse of the Profession" report, it says that 75% enterprises that are highly agile are more responsive to the dynamics of the competitive market and complete their projects successfully than those with low agility at 56%.*
- *As per research conducted at the Massachusetts Institute of Technology, it says that agile enterprises grow revenue 37% faster and also generate 30% higher profits than non-agile enterprises.*

About Invensis Learning
