Gain critical skills to build and lead an Agile organization
For enterprises globally, surviving in today's dynamic business landscape depends on how Agile transformation happens. With Agile transformation, businesses are witnessing drastic improvement in productivity, performance, growth, profitability, and higher customer satisfaction. The biggest enablers for successful Agile transformation are leaders, especially senior leadership who develop new Agile mindset and capabilities for them to trickle down across departments and organically mature as an Agile organization.

Professional Agile Leadership (PAL 1) certification training addresses in-depth Agile leadership development in an organization. The PAL Essentials training is an intermediate-level course that helps to build skills and competencies to bring in organizational agility and help supporting teams to achieve higher performance.

PAL Essentials Training Course Overview

- Theory and Principles
- Improving Value Delivery
- Value – The “What”
- Culture – The “Who”
- Professionalism – The “How”
- Scaling

Note: The training materials are created and maintained by Scrum.org’s Ken Schawber, who is the co-creator of Scrum. PSTs delivering this PAL 1 certification training bring their own real-life experiences and style to the course, but everybody used the same material across the globe to ensure participants learn the same content irrespective of where the course is being delivered and who is teaching it.
